

PUBLIC TRANSPARENCY REPORT

2023

BankInvest

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

BankInvest has been a PRI signatory since 2008 as we believe we have a responsibility towards our investors to incorporate material risks in our investment decisions. Besides that, we must take responsibility for the sustainable impact we create through our investment decisions. BankInvest aims to contribute positively to the green transition while delivering the best possible returns to our investors. Our approach is a company-wide integration of ESG factors in investment-, risk- and compliance processes, giving the investment professionals the relevant ESG information for making decisions. We believe in active ownership and engage with the companies we invest in. We also believe in transparency and thus make quarterly ESG and sustainability reporting for all our funds where data is available. This also includes the carbon emission of our funds. We participate in investor initiatives such as Climate Action 100+, CDP and Net Zero Asset Managers. Some portfolios have a certain sustainability overlay, meaning they have stronger ESG profiles and lower CO2 emissions than their peers. Specifically, three funds were certified with the Nordic Swan Label ("Svanemærket"), which means they met the Swan Label's 25 requirements for sustainable investment funds.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

In 2022, BankInvest continued to incorporate sustainability considerations as an integrated part of our investment decisions. We delivered on our Net Zero commitment by setting targets for our assets under management (AUM). BankInvest has made the commitment that around 43% of AUM (as of 31.12.2021) will be managed in line with the Net Zero Asset Managers Initiative. For the committed AUM, BankInvest aims to reduce the carbon footprint by 55% from the end of 2019 to 2030. The target is based on the benchmarks for the committed AUM. In addition, we refined our active ownership for Danish equity funds such that we now seek extended access to the chairperson of board in the companies we are invested in, we ensure board member independence and focus on material ESG factors and risks as well as promote ESG KPIs as an integral part of senior leaderships' compensation package. During Q4, BankInvest was successful in doing the ground-work to prepare for the launch of four Article 9 products in 2023. Moreover, extensive work with implementing needed changes to the prospectuses according to the SFDR was done, including developing a methodology for evaluating whether an investment is a sustainable investment according to SFDR.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We laid the foundation for the launch of two Article 9 Climate funds, launched in Q1 2023. With regards to our Net Zero commitment, we expect to increase committed AUM to include more asset classes as well as client mandates. Furthermore, it has been decided that ESG will become a core pillar in our updated BankInvest Group Strategy to be finalised in 2023. This implies that delivering on our responsible investment commitment will become essential for all funds across BankInvest and the funds' performance will be monitored through a set of ESG KPIs. Moreover, it is expected that we will be further developing our active ownership commitment by deep-diving on our voting and engagement frameworks. We also expect to further develop and improve our data setup and model testing to advance and improve our Principal Adverse Impact indicator model (SFDR) .

(F) Real estate

The real estate funds we invest in are wrapped in a structure. Through that structure our exposure to real estate consists of fixed income investments. Therefore, we do not have any formal influence on the management of the assets as long as the bond terms, such the investment strategy, are complied with. We can thus only seek influence through our continuous dialogue with the asset manager. We frequently use these dialogues to improve transparency and reporting.

PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

BankInvest calculates the Climate Value-at-Risk (CVaR) for its mutual funds. CVaR is an aggregation of the effect of transition and physical climate risk scenarios. CVaR represents the present value of the total future policy risk costs, technology opportunities, extreme weather event costs and profits expressed as a percentage of the portfolio's market value, if those scenarios were to materialize by 2050. BankInvest's ESG team investigates how BankInvest's approach to responsible and sustainable investments is viewed from an "inside-out" perspective, while CVaR can be interpreted as an "outside-in" point of view.

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Climate-related risks and opportunities are integrated into BankInvest's investment strategies and processes, as reflected in the Policy for Responsible Investments and the Sustainable Risk Policy.

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- (B) Yes, using the One Earth Climate Model scenario
- (C) Yes, using the International Energy Agency (IEA) Net Zero scenario

(D) Yes, using other scenarios

Specify:

CVaR calculations are based on a "REMIND" model and a 1.5°C scenario calculation. REMIND stands for "Regional Model of Investment and Development," which is a forward-looking model of the global economy developed by the Potsdam Institute for Climate Impact Research

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

BankInvest applies the Climate Value-at-Risk (CVaR) methodology to identify, assess and manage its climate related risks. CVaR is an aggregation of the effect of transition and physical climate risk scenarios. CVaR represents the present value of the total future policy risk costs, technology opportunities, extreme weather event costs and profits expressed as a percentage of the portfolio's market value, if those scenarios were to materialize by 2050

(2) Describe how this process is integrated into your overall risk management

The Committee for Responsible Investments continuously monitors market developments and decides how climate-related risks should be measured, monitored, and managed. The committee may, for example, choose to exclude particularly carbon-intensive sectors, as was seen with the exclusion of coal mining companies. BankInvest continuously monitors and reports on the extent (low/medium/high) to which a mutual fund's return is expected to be affected by sustainability risks.

New potential exclusion criteria are evaluated on an annual basis (most recently, Arctic Drilling was added across all funds). Monthly, all strategies are analysed to identify the highest risk contributors based on a range of sustainability factors (e.g. carbon, ESG, controversies, etc.), and often this leads to divestments. On a regular basis, monitoring of new initiatives is added to meet investors' and/or regulators' demands, e.g. 'Green transition' initiatives such as Science Based Targets commitments. Finally, we use Climate Var and our Net Zero Asset Manager initiative commitment to steer away from companies with a potential high climate risk

New potential exclusion criteria are evaluated on an annual basis (most recently, Arctic Drilling was added across all funds). Monthly, all strategies are analysed to identify the highest risk contributors on a range of sustainability factors (carbon, ESG, controversies, etc). On a regular basis, monitoring of new initiatives is added to meet investors' and/or regulators' demands, e.g. 'Green transition' initiatives such as Science Based Targets commitments. Finally, we use Climate Var and our Net Zero Asset Manager initiative commitment to steer away from companies with a potential high climate risk
